Growing ACR with Azure Arc

Matt Crumb
Solutions Architect | TD SYNNEX

Ryan Tye
Azure Business Development Rep

Agenda

- What is Azure Arc?
- Azure Arc to drive revenue
- Azure services with Azure Arc
- Sample opportunity

What is Azure Arc?

Copilot says:

“Azure Arc acts as a bridge that projects non-Azure resources—such as servers, Kubernetes clusters, and databases—into Azure Resource Manager, so you can manage them as if they were native Azure resources. This means you get a single control plane for hybrid and multi-cloud environments without moving workloads into Azure.”

Azure Arc as a Growth Opportunity

- Average number of on-prem hosts: 1-2
- Average number of virtual machines: 2-5 per host
- New workloads (app services, K8s/containers)
- Other clouds

How can you capitalize?

Azure Arc to Drive Revenue

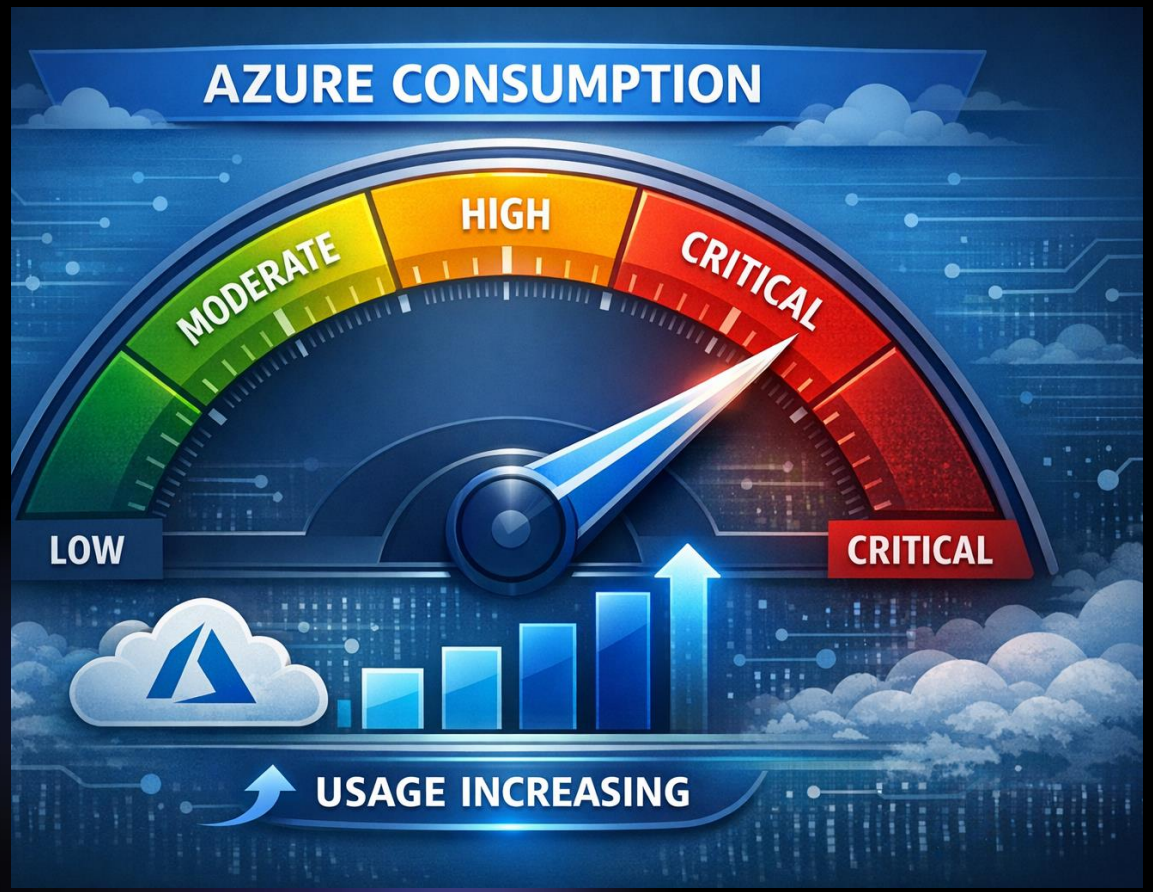

Start with Arc as the “Control Plane Trojan Horse”

- **Azure Arc is FREE!**
  - Onboards non-Azure servers, Kubernetes, and SQL into Azure
  - Normalizes Azure management, security, and governance
  - Creates technical and commercial gravity toward Azure services
  - Established customer “stickiness”

Arc is not the revenue play. What you attach *after* Arc is.

High-Impact Consumption Levers

- **Enable**
  - Azure Monitor
  - Log Analytics
  - VM insights
- **Collect**
  - Performance counters
  - Security logs
  - Application logs

Defender for Cloud (Strong Security-Driven Expansion)

- **Arc-enabled servers unlock**
  - Defender for Servers (Plan 1 / Plan 2)
  - Defender for SQL (on Arc SQL)
  - Defender for Kubernetes

Azure Policy & Governance (Compliance leads to spend)

- **With Arc, you can enforce:**
  - Azure Policy on non-Azure resources
  - Guest Configuration
  - Tagging, patching, and security baselines

Governance conversations open doors to Enterprise-wide rollouts

Azure Arc-enabled SQL (Modernization)

- **You can drive consumption via:**
  - Azure Arc-enabled SQL Managed Instance
  - Azure Arc-enabled SQL Server
  - Azure SQL pay-as-you-go (license-included)
- **Revenue angles**
  - Replace Software Assurance with PAYG
  - Enable:
    - Azure Monitor for SQL
    - Defender for SQL
    - Automated backups
    - Entra ID authentication

Modernize SQL where it runs, without migrating

Azure Services with Azure Arc

Microsoft Defender for Endpoint

- **Designed to prevent, detect, investigate, and respond to advanced threats on their endpoints**

Defender Plan 1: $5/server/month

Defender Plan 2: $15/server/month

Azure Update Manager

- **Manage updates for all your machines, including those running on Windows and Linux**

$5/server/month

Azure machine configurations / Azure Policy

- **Monitor changes and provide detailed inventory**

$6/server/month

Azure Hotpatching

- **Install OS Security updates without having to restart the machine**
  - WS 2025 ONLY

$1.50/core/month

Azure Monitor

- Analytics Logs
- SCOM Managed Instance

Logs: $2.30/GB

SCOM: $6/instance/month

Microsoft Sentinel

- **Microsoft's SIEM solution used to anticipate and stop attacks**

$4.30/GB-ingested

Microsoft Licensing Opportunities

SQL Server

Windows Server 2025

Extended Security Updates

SQL Server pay-as-you-go enabled by Azure Arc

Pay-as-you-go	Monthly Rate	Hourly Rate
Standard Edition	$73/core	$0.10/core
Enterprise Edition	$273.75/core	$0.375/core

Windows Server pay-as-you-go enabled by Azure Arc

Pay-as-you-go	Monthly Rate	Hourly Rate
Windows Server 2025	$33.58/core/month	$0.046/core/hour

Extended Security Updates enabled by Azure Arc

WINDOWS SERVER 2012/R2

Extended Security Updates	Datacenter Monthly Rate	Standard Monthly Rate
Windows Server 2012 16 Core	$437	$76
Windows Server 2012 8 Core	$219	$38
Windows Server 2012 2 Core	$55	$9.47

SQL SERVER

Extended Security Updates	Enterprise Monthly Rate	Standard Monthly Rate
SQL Server 2012 2 Core	$979	$249
SQL Server 2012 4 Core	$1,081	$278

****Billed back to end of support dates****

What’s the ACR potential?

Sample Opportunity

AZURE SERVICE	MONTHLY COST	QTY	MONTHLY TOTAL
Defender Plan 1	$5/server	10 VMs	**$50**
Update Manager	$5/server	10 VMs	**$50**
Hotpatching	$1.50/core	20 vCores	**$30**
SQL Server Standard	$73/core	2 vCores	**$146**

$276/month
$3,312/year

Summary

- Azure Arc control plane is FREE!
- Multiple Azure services become available once Arc-enabled
- Large ACR potential in hybrid environments
- Customer “stickiness”
- Propensity to move to Azure due to familiarity
