FinOps in Action:
Cost Savings That Strengthen Azure Partnerships

Matt Crumb
Solutions Architect

Ryan Tye
Azure Business Development Rep

Taylor Farnham
Director of Strategic Partnerships, *Archera*

Agenda

- What is Cloud Cost Optimization?
- Azure Cost Savings Options
- CCO Tools
- Archera
- Growing Relationships with Cost Savings

TD SYNNEX | Microsoft

Microsoft InnovAIte

What is CCO?

FinOps Framework

finops.org/framework

FinOps is an operational framework and cultural practice which **maximizes the business value of cloud and technology**, enables timely data-driven decision making, and creates financial accountability through collaboration between engineering, finance, and business teams.

Principles

- Teams need to collaborate
- Business value drives technology decisions
- Everyone takes ownership for their technology usage
- FinOps data should be accessible, timely, and accurate
- FinOps should be enabled centrally
- Take advantage of the variable cost model of the cloud

FinOps Foundation

Business Strategy ↔ **Technology Strategy**

Scopes give context for Practitioners to apply the FinOps Framework.

Public Cloud | SaaS | Data Center | Licensing | AI | Your custom Scope

Core Personas are always engaged in a FinOps practice.

- Engineering
- FinOps Practitioner
- Finance
- Leadership
- Procurement
- Product

Allied Personas support a FinOps practice.

- ITFM
- ITAM
- ITSM
- Security
- Sustainability

Domains are the outcomes of a FinOps practice & **Capabilities** describe how to achieve them.

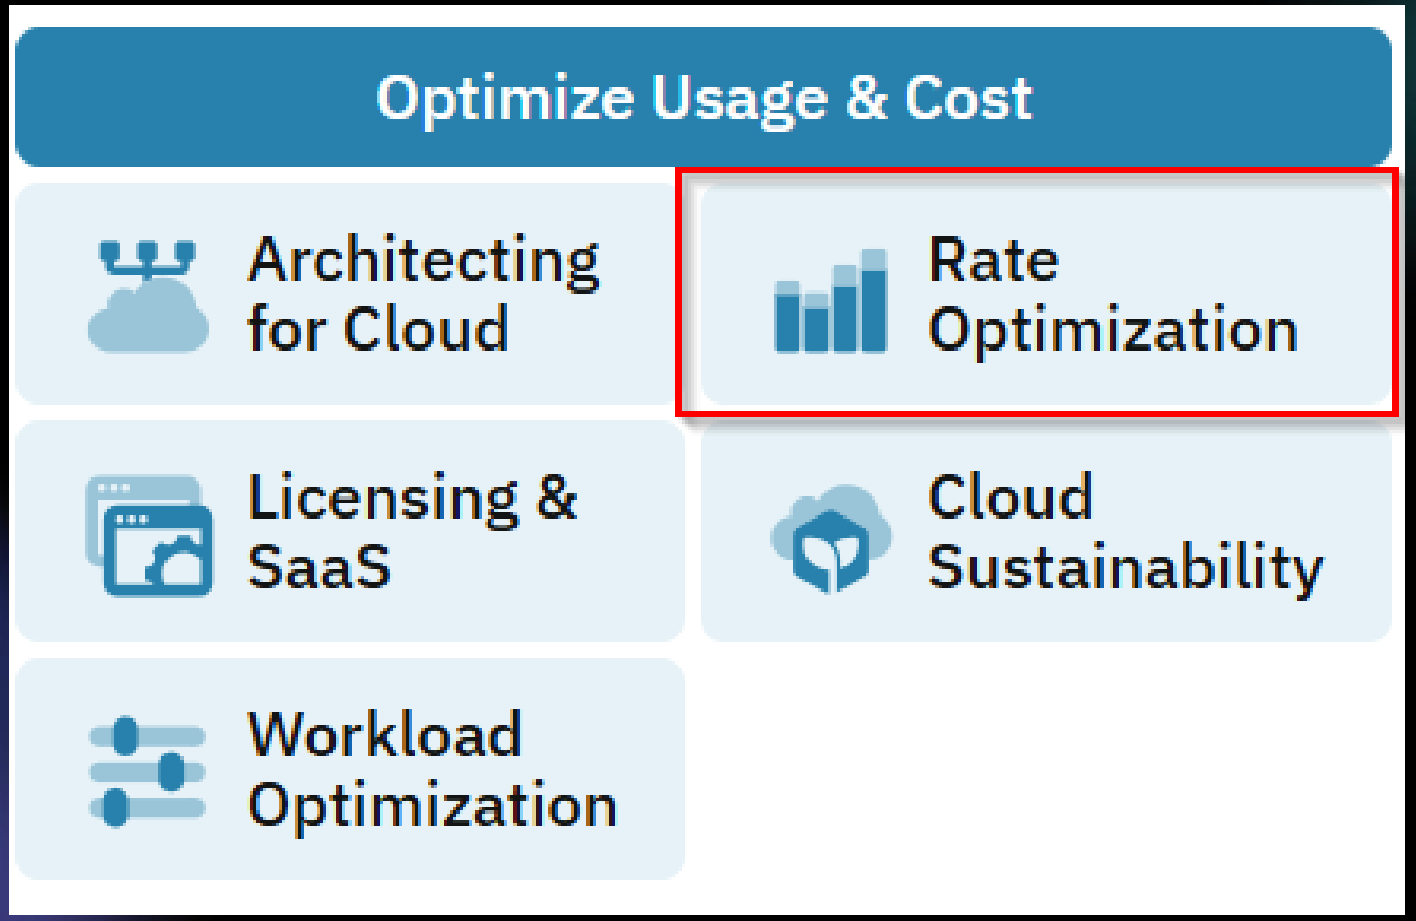

Understand Usage & Cost	Quantify Business Value		Optimize Usage & Cost	
Data Ingestion	Planning & Estimating	Benchmarking	Architecting for Cloud	Rate Optimization
Allocation	Forecasting	Unit Economics	Cloud Sustainability	Workload Optimization
Reporting & Analytics	Budgeting		Licensing & SaaS	
Anomaly Management				

Manage the FinOps Practice

FinOps Practice Operations	Policy & Governance	FinOps Assessment	FinOps Tools & Services
FinOps Education & Enablement	Invoicing & Chargeback	Onboarding Workloads	Intersecting Disciplines

FinOps Foundation Framework 2019 - 2025. Use of the FinOps Framework requires attribution to the FinOps Foundation under the cc by 4.0 license.

Rate Optimization

Azure Cost Savings

Azure Cost Savings

Reservations

Savings Plans

Azure Hybrid Benefit

Azure Cost Savings

Reservations

Azure Reservations

Discount for committing to specific compute resources

Discount applies only to matching compute resources & region

1- or 3-year terms (upfront or monthly)

May be cancelled (penalty may apply)

Virtual Machine Reservations

- Compute Meter Only
  - ~~OS license~~
  - ~~Disk~~
  - ~~Networking~~
- Region
- Instance family
- Number of vCores
- Hourly discount

Service name	Meter	Cost
Virtual Machines Licenses	4 vCPU VM License	$108.85
Bandwidth	Intra Continent Data Transfer Out	$0.41
Bandwidth	Standard Data Transfer Out	$0.30
Bandwidth	Inter Continent Data Transfer Out - NAM or EU To Any	<$0.01
Virtual Machines	E4ds v5	$0

Multiple Reservations Options

- Virtual machine
- Azure Blob Storage
- Azure Managed Disks
- SUSE Linux
- Azure VMware Solution
- Nutanix on Azure BareMetal
- Virtual Machine software reservation
- Microsoft Foundry Provisioned Throughput
- Microsoft Agent Pre-purchase Plan
- SQL Database and SQL Managed Instance
- Azure Dedicated Host
- Azure Databricks Pre-Purchase Plan
- Red Hat Plans
- Azure Files Reserved Capacity
- Azure SQL Edge
- JBoss EAP Integrated Support (App Service)
- Microsoft Defender for Cloud Pre-Purchase Plan
- Azure Synapse Analytics (data warehousing only)
- Azure Database for MySQL
- Azure Cache for Redis and Managed Redis
- Azure Red Hat OpenShift
- Data Factory
- Azure Arc-enabled SQL Managed Instance
- Azure Backup
- Microsoft Sentinel Pre-Purchase Plan
- Azure Cosmos DB
- Azure Database for PostgreSQL
- Azure Data Explorer
- App Services
- Azure NetApp Files
- Azure Synapse Analytics Pre-Purchase Plan
- Microsoft Fabric
- Copilot Credit Pre-Purchase Plan

Reservations Savings Examples

Virtual Machine – D2ds_v5, East US

- PayGo: ~$83/month
- 1YR RI: ~$49/month (~41% savings)

Microsoft Fabric – F64, East US

- PayGo: ~$8,410/month
- 1YR RI: ~$5,003/month (~40% savings)

SQL Database – 4 vCore, Gen Purpose, East US

- PayGo: ~$445/month
- 1YR RI:~$289/month (~35% savings)

Capacity Reservations

- No term commitment (Can be added with RIs)
- “Reserved” capacity if it’s available (SLA when it’s not)
- Charged at pay-as-you go rate for underlying VM
- Must have quota in the region!
- Not all series/sizes supported
- Only usable in the subscription where it was created

Azure Cost Savings

Savings Plans

Azure Savings Plans

- Discount for committing to fixed hourly amount
- Discount applies to most compute resources
- 1-year monthly, 1-year upfront, 3-year upfront
- Cannot be cancelled or changed
- Can coexist with Azure Reservations

Azure Savings Plans - Explained

If your usage is less than or equal to your hourly amount:

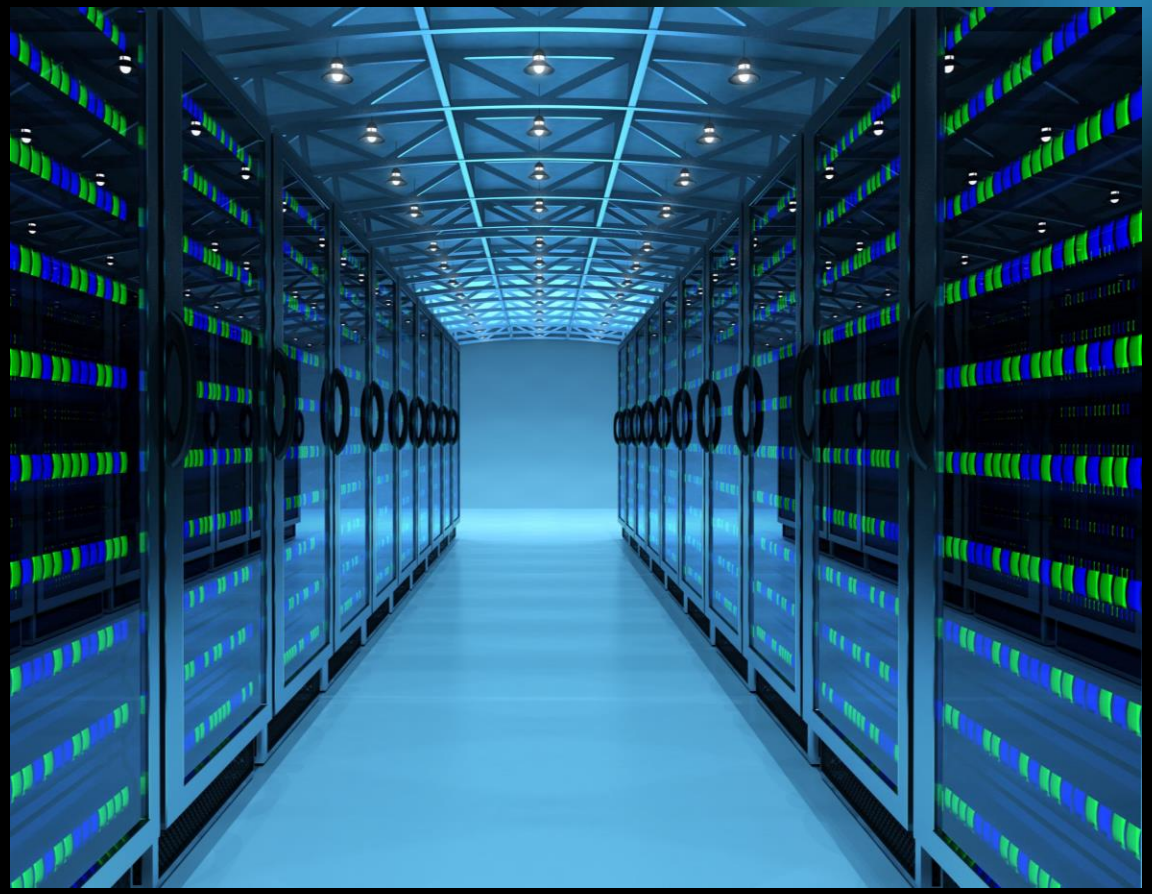

- Get lower, savings plan prices.
- Pay the full hourly amount, even if usage is less. Incur no additional costs—usage is covered by the plan.

If your usage is greater than your hourly amount:

- Usage up to your hourly amount is billed at lower prices and included in the cost of your plan.
- Additional usage is billed at pay-as-you-go prices and invoiced separately.

Azure Savings Plans – Eligible Resource Types

- Azure Virtual Machines
- Azure App Services
- Azure Kubernetes Service
- Azure Virtual Desktop
- Azure Red Hat Open Shift
- Azure Functions (premium plan)
- Azure Container Instances
- Azure Dedicated Hosts
- Azure Container Apps
- Azure Spring Apps Enterprise

Azure Savings Plans - Purchase

Basics | Review + buy

Savings plan helps you save money on Azure products and services but with additional flexibility. By committing to a consistent amount of usage for 1 or 3 year terms, you receive significant savings on compute resource as you use them.

Name *: Compute_SavingsPlan_04-04-2024_09-10

Billing subscription *: Production (...)

Apply to any eligible resource *:
- (•) Shared across the subscription's billing scope
- ( ) Only in the subscription (Production)
- ( ) In a specific resource group in the selected subscription
- ( ) In a management group of the selected subscription

Term length *:
- ( ) 3 years
- (•) 1 year

Hourly commitment in USD *: 4.885

View recommendations

Billing frequency *:
- (•) Monthly
- ( ) All upfront

Plan cost

Monthly cost of plan	**USD 3,566.05/month**
Total cost of plan	**USD 42,792.60**

Total does not include taxes.

Savings plans do not apply to operating system, software, storage, or networking charges.

WINDOWS SERVER

Windows Server with Software Assurance

OR

CSP Subscription License

Savings up to 83%

over “Pay As You Go” rates

Windows Server AHB Example

D4s_v5 – East US

- PayGo Rate - $1,612/year ($135/month)
- **CSP 1-Year Subscription License (8-core) - $275/yr**
  ~ 83% Savings
- **CSP 3-Year Subscription License (8-core) - $235/yr**
  ~ 85% Savings

Minimums – 16 cores per tenant, 8 cores per VM

CCO Tools

PAC Proxy

- Allows reseller or customer to access TD SYNNEX PAC
- Allows fine-grain control over what and who can be accessed
- Global solution at TD SYNNEX (all PACs worldwide)
- Requires minimal change to how Microsoft APIs are utilized
- Available at no cost for resellers and their end users

Archera

Archera

Customers commit & consume more when they're protected from risk.

- Accelerate consumption by unlocking budget for more projects
- Increase stickiness with commitment-based rate optimization
- Transform RIs & SPs into a new source of revenue

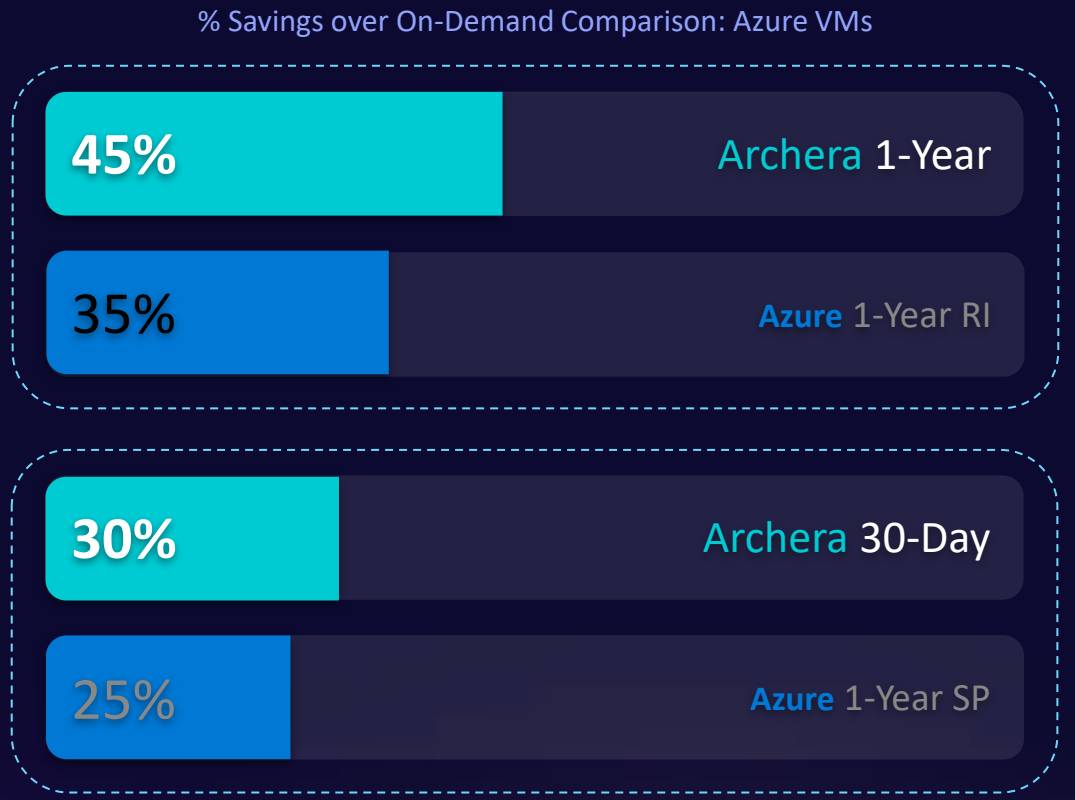

A new way to commit

Gauranteed commitments are built on native Azure instruments.

- ***Flexible term lengths*** from one month to three years
- ***More savings*** than on-demand and default commitments alone
- ***All Azure Services*** with commitment discounts supported

Functions VMs AKS Dedicated Host Machine Learning Container Instances Container Apps

Fabric Blob Storage Azure Files Disk Storage OpenAI VMware Solution Databricks App Service

Sentinel Defender NetApp Files Backup Cache for Redis SQL DB MySQL DB PostgreSQL DB Cosmos DB Spring Apps

Archera

Unique value for TD SYNNEX MSPs

Self-service Azure commitments without the risk

- **Eliminate** purchase bottlenecks with secure self-service
- **Prevent** costly over-commitment errors
- **Rebates** offset negative savings — without consuming the $50K limit

Archera

Microsoft InnovAIte

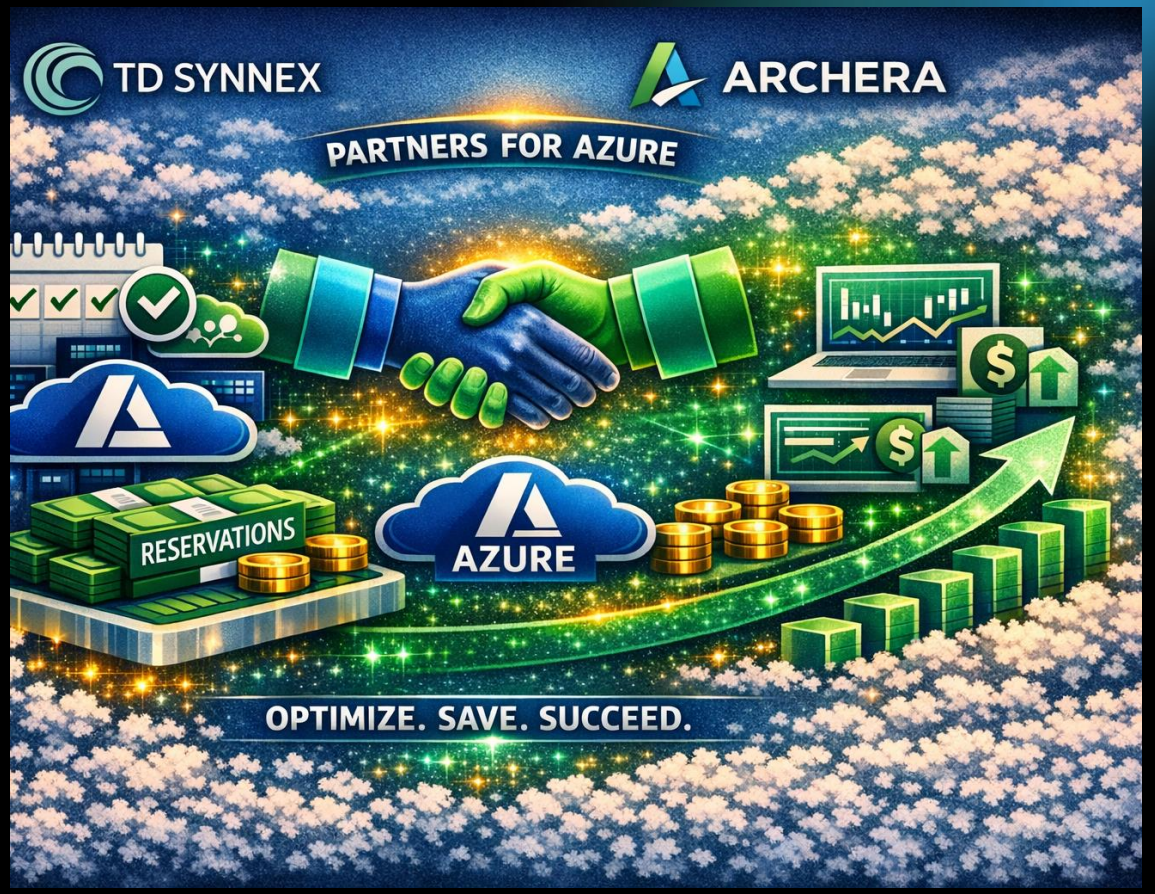

The Business Opportunity

What Problems the PAC Proxy Solves

- **Third-party ISVs frequently request deeper visibility into customer consumption, billing, or subscription data for automation, forecasting, or FinOps tooling. However, in the CSP Indirect (Tier-2) model, this creates significant security and policy conflicts.**
- **Allowing an ISV into billing scope would expose:**
  - Customer consumption data.
  - Subscription details
  - Azure resource metadata
  - Potentially sensitive workloads
- **This violates the CSP design, which ensures:**
  - No external ISV may be granted admin or billing privileges.
- **If there is a provider you are using outside of your CSP practice that you feel would open new opportunities for your firm, we would love to speak with them.**

The Archera and TD SYNNEX Sales Opportunities

- Over the last ten years, cost-saving instruments within Azure have evolved into essential business investments. The lack of front-end margin has made many resellers look at them simply as a cost of doing business.
- Through a TD SYNNEX Private Offer our partners secure an additional 20 points of margin on Archera's guaranteed commitments.
- Integrating Archera should be a mandatory component of the onboarding process for new customers.

How to Turn CCO into Additional Revenue Long Term

- **Strengthen Customer Relationships**
- Drive lifetime value consistent cost-optimization touchpoints—such as reviewing unused or underused resources
- **Expand Into Managed & Professional Services**
- Environment health checks & optimization engagements
- Well-Architected Framework (WAF) reviews
- FinOps-aligned managed services
- Migration assessments and workload modernization projects
- **Use Savings to Justify New Workloads**
- Many customers reinvest savings into net-new Azure initiatives. Offering optimization first often warms customers up to the idea of expansion into Azure.
