Microsoft 365 Copilot chat in Calls app post-calling experience – Generally available

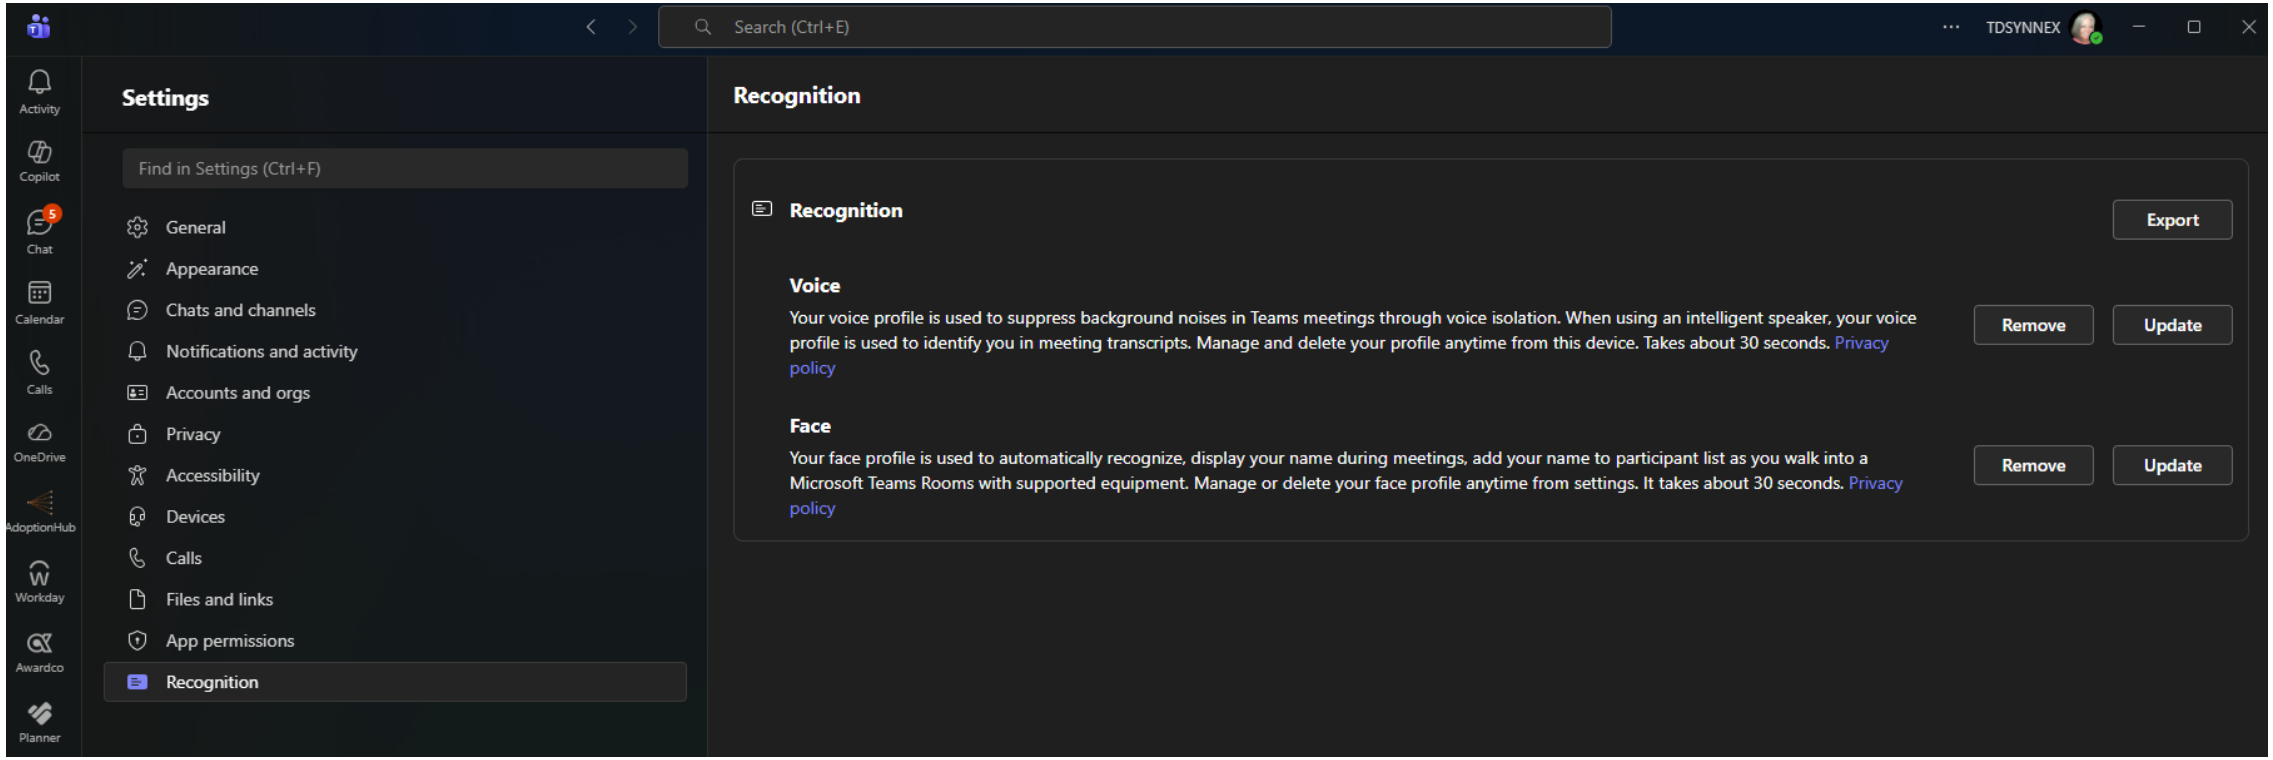

The post-call Copilot experience for Teams Phone on desktop and in mobile is now powered by Microsoft 365 Copilot Chat. After a call ends, users can open Microsoft 365 Copilot Chat as a side panel in the Teams 'Calls' app to generate summaries, surface key insights, and get suggested next steps. By using data from Microsoft Graph and the web—not just the call transcript—Microsoft 365 Copilot Chat delivers responses that are more personalized, relevant, and actionable, helping users quickly move from conversation to follow-up.

That would be nice
I'm pretty confident that this launch will be successful. The team has worked tirelessly to make it possible. This is going to be awesome.

Altigen | Direct Routing Partner with TD SYNNEX

Your Single Vendor for Teams Phone

Microsoft Teams Phone is the fastest growing enterprise communications platform in the world.
Altigen has the expertise needed to maximize the capabilities of Microsoft 365, Teams Phone and Azure.

- **Seamless Teams Phone Integration**
  Replace your traditional PBX with Microsoft Teams Phone, ensuring reliable, cost-effective enterprise communication.
- **CoreEngage Omni-Channel Contact Center**
  A fully native Teams-based contact center supporting voice, chat, SMS, social media, and WhatsApp.
- **Microsoft-Certified Direct Routing**
  Secure, high-quality SIP trunk services with domestic & international calling, number porting, caller ID, and E-911.
- **PBX to Teams Migration & Deployment**
  Effortless migration from your existing system to Teams, including project planning, deployment, and support.
- **24/7 Teams Premier Support**
  Ongoing technical support to keep your Teams platform running smoothly at all times.

Easy AI Xperience

Teams Phone. Simplified. Supercharged.

AI-powered observability, agents, and network visibility for Microsoft Teams

TD SYNNEX InnovAlte

February 2026

DEPLOY IN HOURS | **60% TICKET DEFLECTION** | **AI ROOT CAUSE IN <2 MIN**

TeamsCoreIQ

See Everything. Fix It Fast.

- ✓ **Intelligent Provisioning**
  Automate user profiles, voice routing, call queues with AI precision
- ✓ **Call Quality Analytics**
  Monitor jitter, latency, packet loss — pinpoint issues before users call
- ✓ **AI Root Cause Analysis**
  Diagnose telephony issues automatically in under 2 minutes
- ✓ **Policy Governance**
  Snapshot, drift detection, one-click rollback for all Teams policies
- ✓ **Migration Orchestration**
  Batch PBX-to-Teams moves with guardrails and automated rollback

Deployed at Fortune 500 retailers and county governments

HD+ Agent

Plug & Prompt. Instant IT Support.

- ✓ **60% Ticket Deflection**
  L1/L2 helpdesk in Teams — answers, troubleshoots, files tickets
- ✓ **Outage-Aware AI**
  Detects Microsoft service issues and notifies users when resolved
- ✓ **ITSM Integration**
  Ingests from ServiceNow, Zendesk, and Jira — no rip and replace
- ✓ **Intune + Purview**
  Policy checks and compliance verification built into every response
- ✓ **Agent Orchestration**
  Karl chains multi-agent workflows — HD+, licensing, executive

Live in production — enterprise and public sector customers

NetmonIQ

Bridge the Gap: UC + Network.

- ✓ **SBC Monitoring**
  Sessions, SIP stats, failover, CDR correlation — real-time health
- ✓ **Network Visibility**
  Multi-vendor device monitoring with auto-discovery and classification
- ✓ **Per-Hop Call Path**
  Visualize QoS at every hop — prove exactly where quality breaks
- ✓ **Predictive Alerts**
  SNMP traps + AI anomaly detection — fix before users notice
- ✓ **ServiceNow Tickets**
  Auto-create enriched incidents with root cause evidence attached

One pane of glass for UC ops and NOC teams together

WHY TEAMS PHONE TEAMS CHOOSE EZAIX

HOURS to Deploy	Azure-Native	Zero SNOW Licenses	Plug & Prompt	Multi-Tenant Ready
Not weeks. Not months.	Every deployment drives ACR.	HD+ replaces ServiceNow for users.	Pre-built knowledge. Day-1 value.	Built for MSPs & resellers.

Look & Listen for Teams Rooms Opportunity

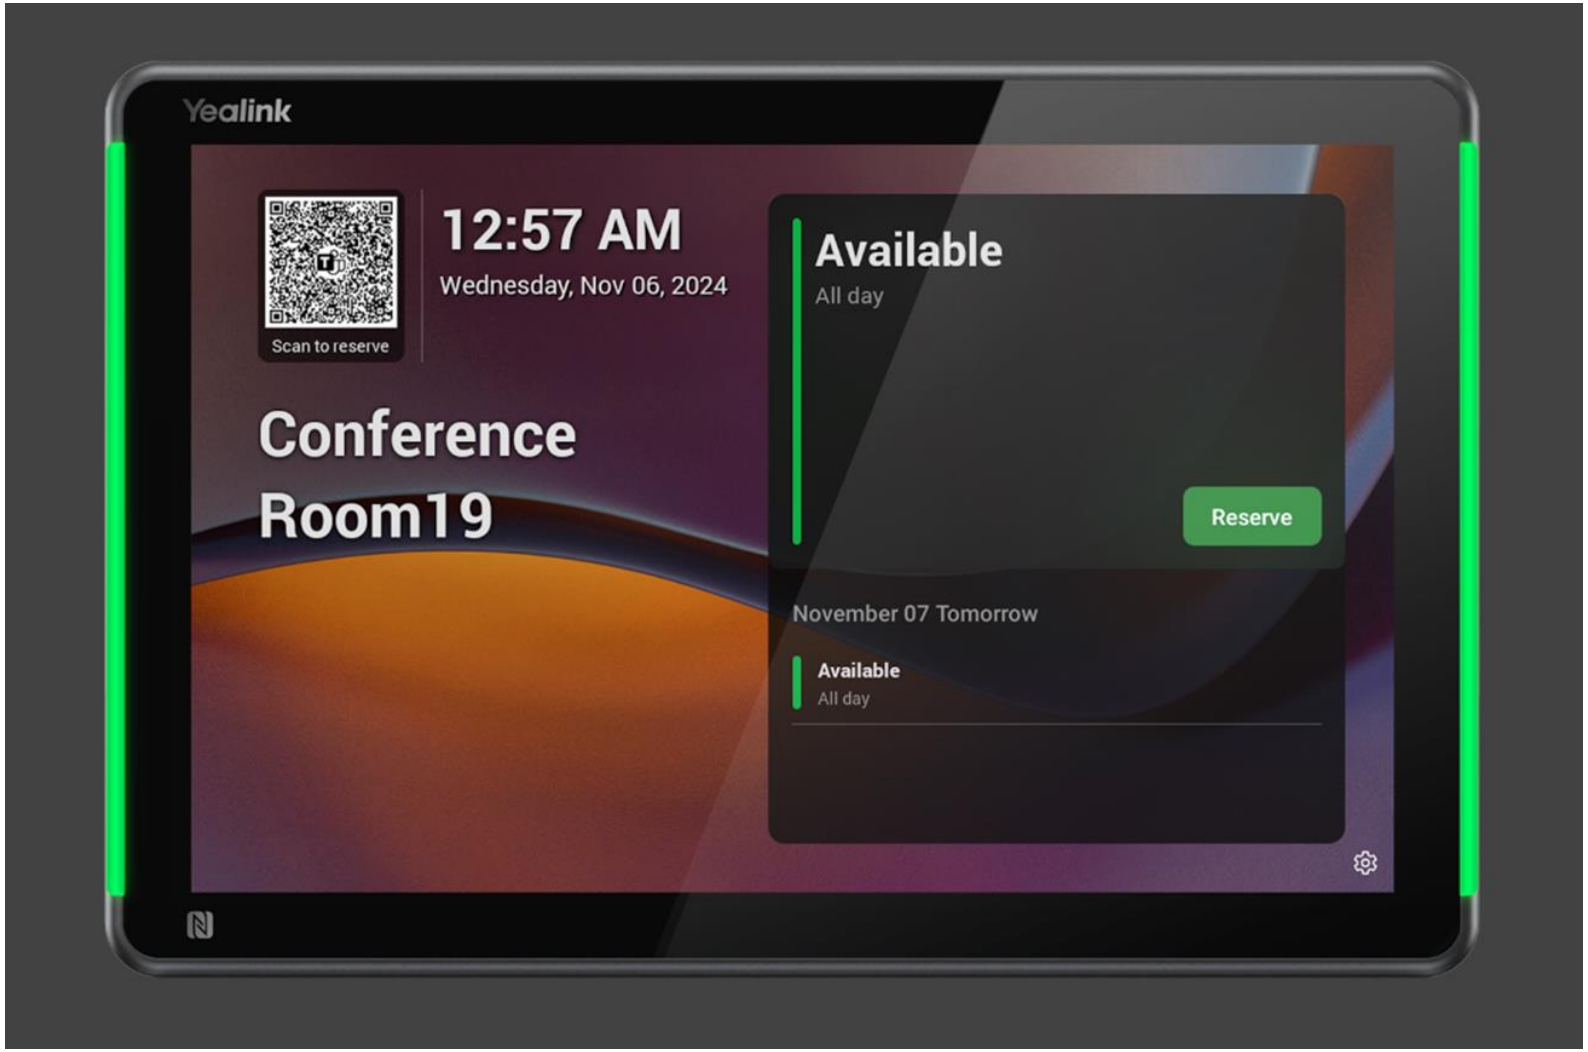

Are Your Customers Saying?

- We are going remote.
- We conduct meetings using Teams but our remote employees feel isolated in the meeting.
- Why can't the camera see everyone's face?
- We record meetings but we need the meeting transcript to be able to tell us who was speaking other than "conference room".
- We like in person meetings but we sure would like to be able to have 2 screens.
- It sure would be great if we had more control of the meeting in the meeting room.
- I am tired of someone walking into my meeting in progress.
- How can our IT team support meeting rooms across town?

Teams Rooms | Panel

Facilitator Agent | Management Console

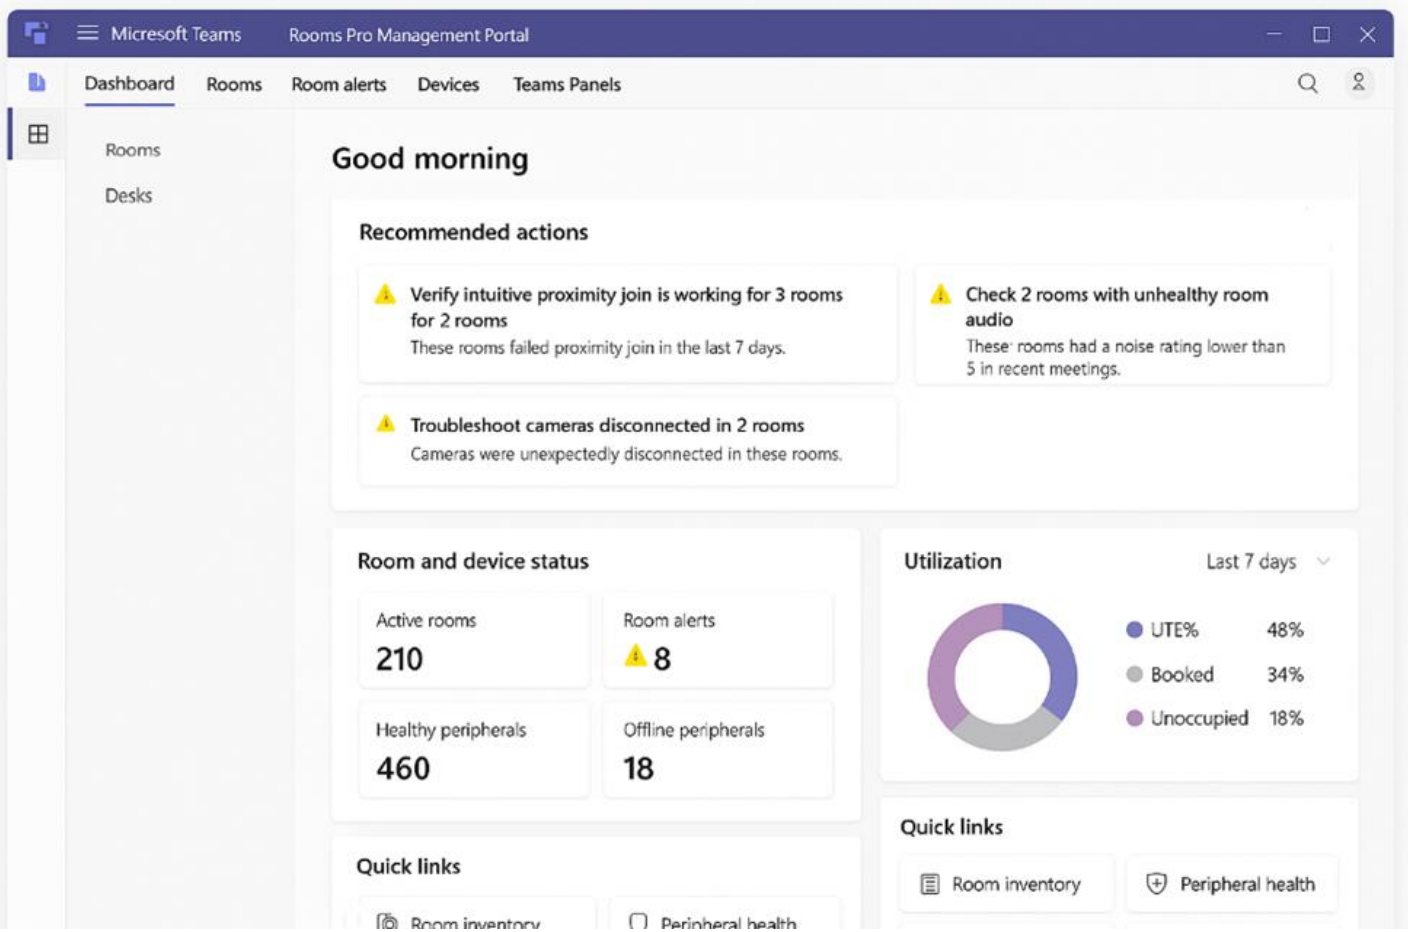

Teams Rooms | Facilitator Agent

- Room participants see Facilitator real-time notes in scheduled meetings if the organizer has activated
- Facilitator can also take notes in ad-hoc, offline meetings in a Teams Room
- Scan a QR Code to invite Facilitator to take notes for the session

Teams Rooms | Management Portal

✅ Prevents failures instead of reacting to them
✅ Centralizes everything room-related
✅ Makes AI features reliable, not experimental
✅ Reduces IT effort while improving meeting success
✅ Bridges IT, facilities & hybrid-work strategy

Hybrid Work | Yealink LinkHub Smart Dock

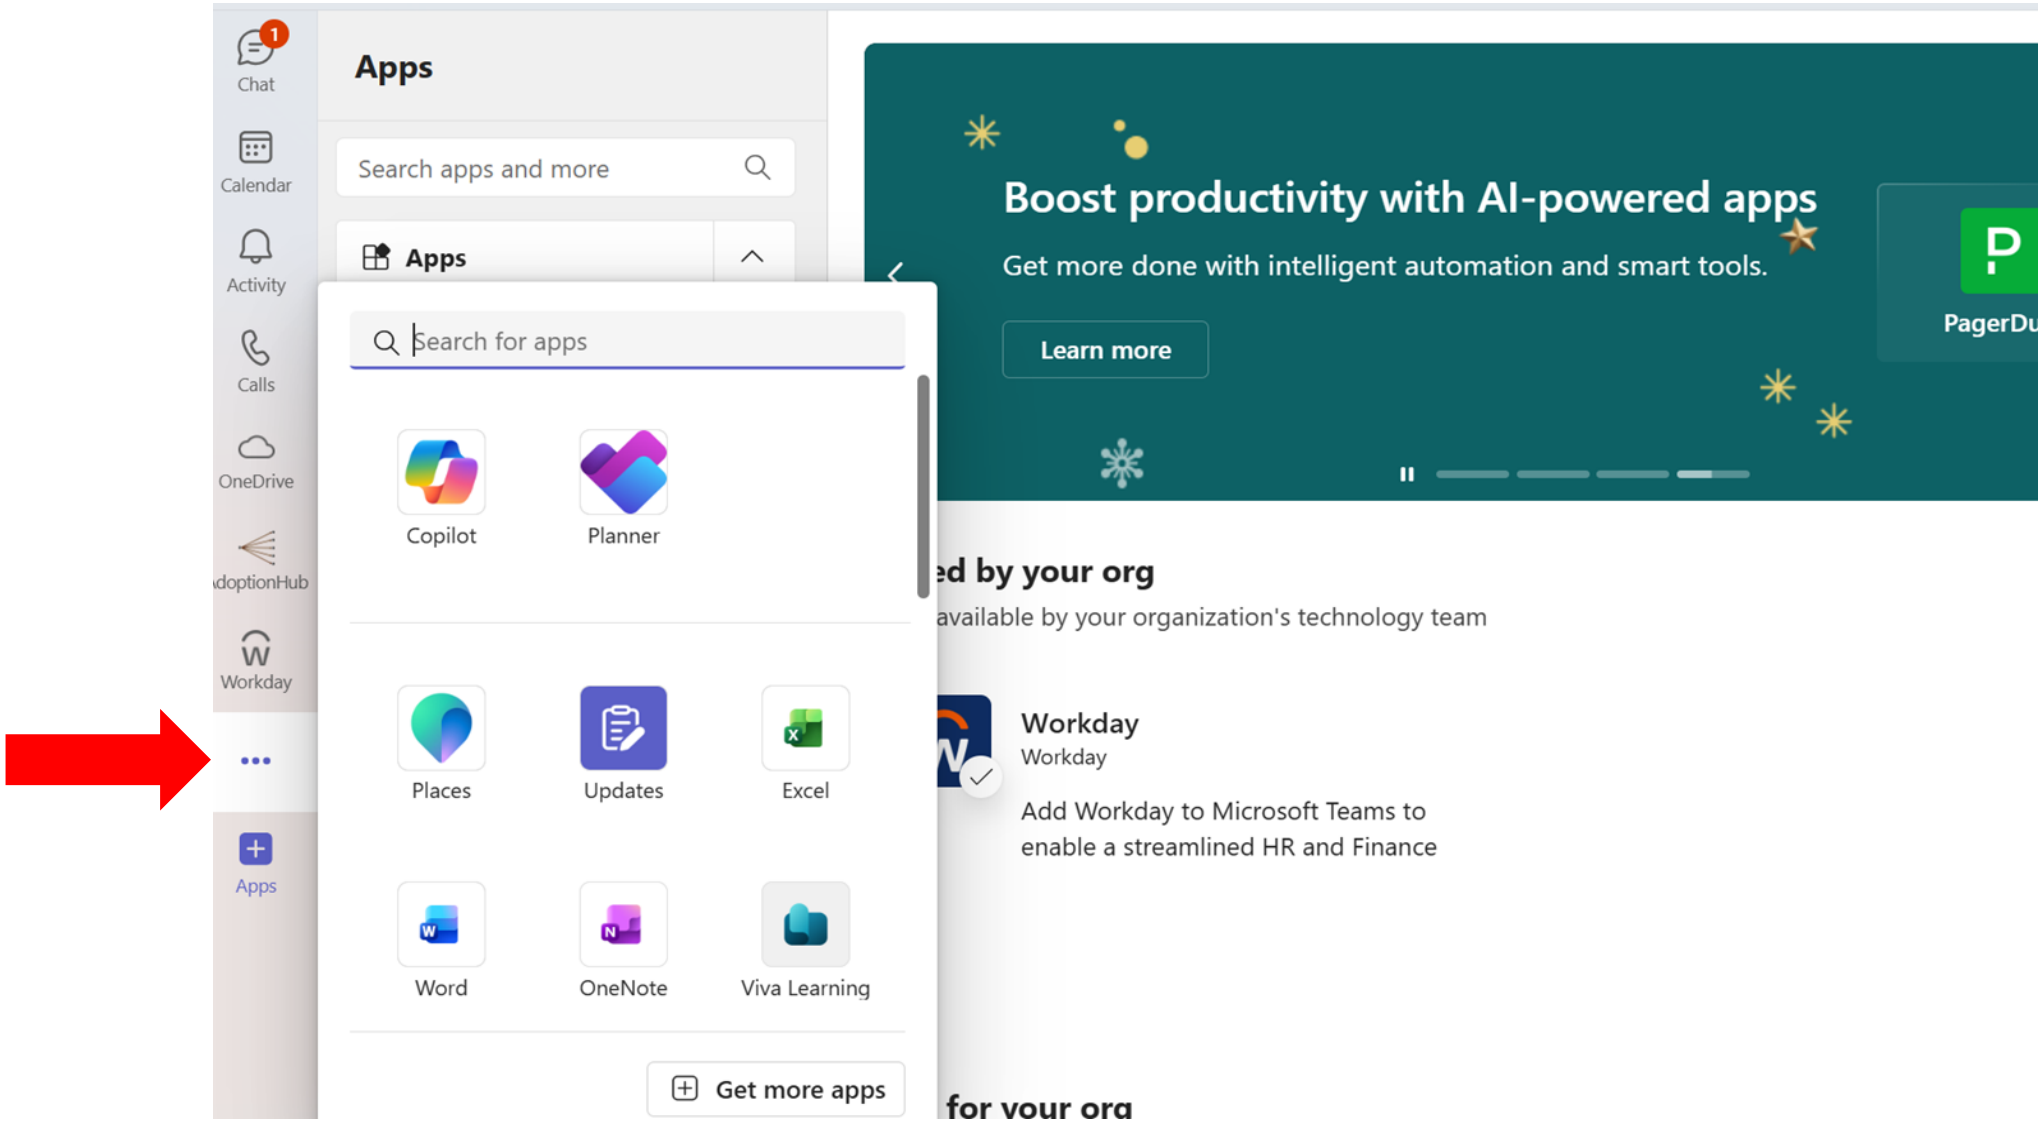

Yealink LinkHub smart dock

The Yealink LinkHub helps employees to find and reserve available desks with a clear LED indicator and intuitive touch display. Its screen syncs with Microsoft Teams to show real-time booking details, and it also works with Microsoft Places so employees can reserve a desk remotely before arriving onsite. Integrated with the Teams Pro Management Portal, LinkHub provides IT admins with centralized control and insights into workspace usage, helping organizations optimize space and enhance the hot-desking experience. This device is currently undergoing the process to be certified as a Certified for Teams device.

Converged Communications

Streamline your communications and drive deeper engagement with seamless and integrated experiences, powered by AI

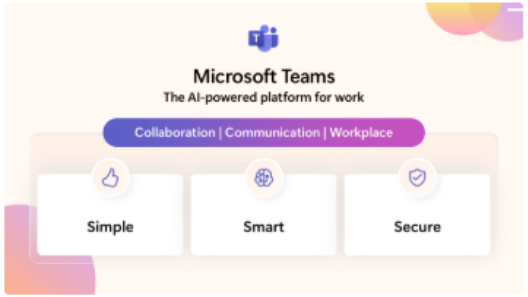

The Converged Communications solution play brings together the full power of Microsoft Teams, uniting Teams Phone, Teams Rooms, Teams Premium, and Microsoft Places* into a single, AI-powered platform for work. This integrated approach enables partners to deliver a seamless, secure, and intelligent communications experience that meets every customer need - from calling and meetings to virtual events and workplace management.

With more than 320 million monthly active users, Microsoft Teams is the trusted platform where work gets done. The Converged Communications solution play is your opportunity to expand your practice, differentiate your offers, and deliver transformative value to customers seeking to modernize their communications landscape.

* Teams Phone, Teams Premium, Teams Rooms, and Copilot in Teams are add-on licenses. Copilot in Teams is part of the Microsoft 365 Copilot license. Microsoft Places requires a Teams Premium license.

Microsoft Teams: Interpreter agent available in Teams

Microsoft Copilot (Microsoft 365) | Microsoft Teams

■■■ LAUNCHED

ROLLOUT START
June 2025

The Interpreter agent enables real-time interpretation in Teams meetings in up to nine languages so each participant can speak and listen in the language of their choice. Meeting participants can also opt-in to have Interpreter simulate their personal voice for a more inclusive experience.

Roadmap ID	Cloud instances(s)	Platform(s)
490740	Worldwide (Standard Multi-Tenant)	Android, Desktop, iOS, Mac, Web

Microsoft Teams: Enhancements to Interpreter and multilingual meeting experience

Microsoft Teams | Microsoft Copilot (Microsoft 365)

■■■ LAUNCHED

ROLLOUT START
December 2025

First, spoken language is now automatically detected and updated across Interpreter, live captions, and live transcription when Interpreter is enabled, keeping all speech features consistent with the language being spoken - no manual setup required. When Interpreter is disabled, live captions and transcription will still work, but auto-update spoken language will not be available, which may result in gibberish or inaccurate content if participants switch languages during the meeting. Next, a new "preparing" status provides clear visual feedback while Interpreter initializes, helping users know when the system is ready -especially important for multilingual meetings. Lastly, Interpreter settings have also been improved with concise explanations for each configuration and field, making setup easier and minimizing confusion.

Roadmap ID	Cloud instances(s)	Platform(s)
520389	Worldwide (Standard Multi-Tenant)	Android, Desktop, iOS, Mac

Microsoft Teams: Interpreter in Microsoft Teams calls

Microsoft Teams

■ ■ □ ROLLING OUT

ROLLOUT START
January 2026

We're expanding the Interpreter agent in Microsoft Teams to include real-time speech-to-speech interpretation for Teams calls. This brings the same functionality previously available in meetings to calls, enabling users to speak and listen in up to nine supported languages. Interpreter helps eliminate language barriers and fosters seamless collaboration across global teams. For a more inclusive experience, users can also opt to have Interpreter simulate their personal voice.

Roadmap ID	Cloud instances(s)	Platform(s)
526777	Worldwide (Standard Multi-Tenant)	Desktop

Release phases(s)

Microsoft Teams: Interpreter agent support in Teams rooms on Windows

Microsoft Teams

■ ■ □ ROLLING OUT

ROLLOUT START
January 2026

The Interpreter agent acts as a translator in Microsoft Teams meetings, allowing participants to listen to the meeting in their chosen language with real-time translation so speaking different languages isn't a barrier to effective understanding and collaboration. It's now available in Teams Rooms on Windows licensed for Teams Rooms Pro.

Roadmap ID	Cloud instances(s)	Platform(s)
516571	Worldwide (Standard Multi-Tenant)	Teams and Surface Devices
